Saratoga Biochar Solutions LLC
NYSDEC Application No. 5-4144-00187/00001
Monday, December 19, 2022**

Record of Emails Received

Email Received From	Sender's Name (as provided)	Date Received	Comment(s) / Question(s)
amyhoffer3@gmail.com	Amy Hoffer	12/21/2022	I was visiting your website in hopes of finding the recording from the 12/20/22 public information meeting but am not locating it. Can you please send me the link? If it has not been posted yet, can you provide a time frame when it will be available?
orrk@sgfcsd.org	Kristine Orr	12/21/2022	I was unable to stay for the whole meeting on Monday. It was recorded. Can that recording be shared so I have the most accurate information?
johnandsharon@hotmail.com	John Farrel	12/20/2022	<ol style="list-style-type: none"> 1. Where is the scientific peer-reviewed research showing the efficacy of this process? <ol style="list-style-type: none"> a. What longitudinal studies have been done to see effects 5, 10 and 20 years down the road? 2. What liability does your company take if the process is shown to be harmful? 3. What kind of disclaimer is required for when/if this "product" leeches into a food source? 4. Why Moreau?
jh@green-ri.com	Jeanne Heston	12/21/2022	Was last night's public meeting recorded? I had signed up for the Zoom meeting, but I was unable to attend.
jmp@green-ri.com	Jacqueline Petrocchi	12/20/2022	I was a registrant for last night's Virtual Public Forum but I was ultimately unable to attend. Will a recording or transcription of the event be available in the near future ? I'd still like to hear some insights.
JPetrequin@news10.com	Jay Petrequin	12/20/2022	Looking to follow up on last night's biochar meeting and see if there's anything to know for future coverage. Will a recording of the meeting be posted anywhere?
joelattimore@verizon.net	Frank (Joe) Lattimore	12/18/2022	In order help your project in going forward I want you to know the City of Logan, Australia has an up and running sewage biochar plant. Good luck from a biochar believer.
tracy.frisch@gmail.com	Tracy Frisch	12/19/2022	I do not have access to any chat or Q/A on the webinar.
geotpc@msn.com	Charlene Endal	12/19/2022	Would like to welcome you and express appreciation for the employment opportunities that will come about. Have you considered a small group of interested people to meet on a regular basis with someone from your admin team?
culhaneblack@gmail.com	Kerri Culhane	12/19/2022	There is no Q&A function visible on Teams, which is why you are not receiving questions that way. This is a good illustration of why people asked for an in-person meeting. The company leadership all have questionable track records. You have said you have learned from your mistakes, but it sounds like you are still learning on the job. Why should you be trusted, if this is just an untested technology? If you believe it should be in your back yard, put it there.
nikolaskrasnove@gmail.com	Nick Krasnove	12/19/2022	What are your anticipated emissions of nitrous oxides, sulfur dioxide, and ammonia in ppm?
cpiohns9999@yahoo.com	Chris	12/19/2022	In addition to the biosolid trucks, how many trucks of wood will be delivered on a daily/weekly basis. Also, how many truckloads of outbound fertilizer trucks can be expected? Ultimately how many total trucks will this enterprise totally involve? According to your website, the phosphorus levels exceed the current NYS EPA allowed levels. Does this mean your product will not be able to be used in NYS?
nasrenehaj@gmail.com	Nasrene Haj	12/19/2022	Can you name 3 other locations where this operates? Separate from the Australia example that was shared? Any in the US or Canada?

Email Received From	Sender's Name (as provided)	Date Received	Comment(s) / Question(s)
hymesk@yahoo.com	Karen Hymes	12/19/2022	<p>1) What is your PROOF, not your hypothesis or wish, that PFAS can be destroyed? The fact that the only two of the three of you with any background or experience in this area have been associated with complaints, violations, and failures is not a comfort to the local residents.</p> <p>2) Why aren't you identifying your local investors? If this is the great boon to the environment that you claim, it seems as though they would want to be identified as being on the ground floor of this technology. Also, you could clearly use the public endorsement of local residents purported to be respected.</p> <p>3) Are any of these unidentified local investors spouses or family members of Moreau officials, elected or appointed?</p> <p>4) If Biochar is going to be such a success, why is Mr. Apy selling his home and moving away from it rather than remaining local to stay close to it?</p>
svillegas@raftelis.com	Samantha Villegas	12/19/2021	I am the author of WEF's Biosolids Communication Toolkit. If you are ever in need of some communications counsel or assistance with messaging, I'd love to help.
